NEUROSCIENCE FOR MENTAL HEALTH SEMINARS

Winter 2015 Calendar

Mondays, 11:00, Bowerman Room, Dobell Pavilion

- January 12** **Dr. Sébastien Jacquemont** (Geneticist; Professor Faculty of Medicine University of Montreal; Researcher CHU Ste-Justine)
Investigating gene dosage in copy number variants associated with autism and schizophrenia
- January 19** **Dr. David Stellwagen** (Assistant Professor, Depts of Neurology & Neurosurgery; Researcher, McGill University)
"Microglial suppression of striatal dysfunctions via TNF-mediated plasticity"
- January 26** **Dr. Cyril Herry** (Researcher INSERM, Université de Bordeaux)
"Prefrontal Neuronal Circuits of Fear Behavior"
- February 16** **Dr. Jeffrey Mogil** (E.P. Taylor Professor of Pain Studies, Psychology Department, McGill University)
"Mice are People Too: Social Modulation of and by Pain in Laboratory Mice and Undergraduates"
- February 23** **Dr. Scott Small, MD, Ph.D.** (Boris & Rose Katz Professor of Neurology, Division of Aging and Dementia, Director, Alzheimer's Disease Research Center, Columbia University)
Isolating pathogenic mechanisms embedded in the hippocampal circuit through regional vulnerability
- March 2** **Dr. Olivier Berton, Ph.D.** (Assistant professor of Neuroscience in Psychiatry, Department of Psychiatry, University of Pennsylvania)
Novel circuit and molecular determinants of social stress resilience
- March 16** **Argel Aguilar Valles, Ph.D.** (Department of Biochemistry, McGill University; Departments of Neuroscience, University of Montreal)
The role of mRNA translation initiation in depression
- March 23** **Dr. Karim Nader, Ph.D.** (Associate professor, Department of Psychology, McGill University)
Forgetting as an active neurobiological memory erasure process
- March 30** **Dr. Natalina Salmaso** (Assistant Professor, Department of Neuroscience, Carleton University)
Astroglial cells in development and plasticity
- April 13** **Dr. Stan Floresco** (Professor, Department of Psychology, University of British Columbia)
Prefrontal GABAergic regulation of cognition, and its relevance to schizophrenia
- April 20** **Dan Madularu, Ph.D.** (Post-doctoral fellow, Alain Gratton's laboratory)
"Dopamine-estrogen interactions in an animal model of amphetamine sensitization"
- April 27** **Dr. Armin Raznahan, MD, Ph.D.** (Scientist, National Institute of Mental Health)
Strategies for Biomarker Discovery in Neurodevelopment Psychiatry
- May 4** **Anita Thambirajah, Ph.D.** (Post-doctoral fellow, Michael Meaney's Laboratory)
Epigenetic regulation of hippocampal development
- May 11** **Dr. Tracy Bale** (Associate Professor of Neuroscience, Center for Neurobiology and Behaviour, University of Pennsylvania)
Stressed Parents: maternal and paternal epigenetic programming of the developing brain
